

Name _____

▶ Read the paragraph below.

Most people agree that Triceratops must have been an amazing dinosaur to look at. First of all, it had three horns on its face. Two were on its forehead, and the other was on its snout. Its mouth looked like a thick beak, but it also had big teeth for grinding plants. Its most unusual feature was a large bony frill behind its head. If you want to see an amazing Triceratops skeleton, there is one on display at the Smithsonian Institution in Washington, D.C.

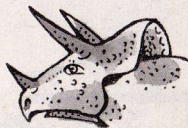

1. Fill in the main idea and details web.

Possible responses are shown.

2. What detail in the paragraph does not support the main idea?

A Triceratops skeleton is on display at the Smithsonian Institution.
